Your Premier ADA Signage

# PARTNER

At Matthews Architectural Products, we understand the challenges of complying with the rigorous ADA standards. Our knowledgeable project management and account teams will guide you through every step of your project to produce the highest quality sign that meets the latest ADA guidelines.

We offer a comprehensive selection of signage solutions with a multitude of design options. Whether you're looking for an affordable acrylic option, a sleek glass design, a modern or traditional metal or have existing signage you need to match, Matthews is your complete signage partner.

Our expert team and quality craftsmanship make it easy for you to design ADA compliant signs that meet your aesthetic, timing and budget.

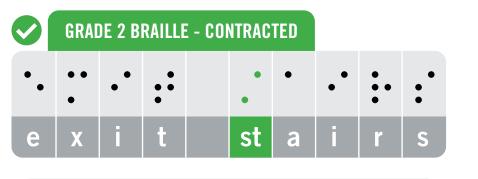

### **QUICK TIPS FOR ADA SIGNAGE**

Our experts can help you create an ADA compliant signage suite that also accomplishes your overall project goals.

Contact our knowledgeable team at 800.950.1317 or SALESDESK@MATW.COM to discuss your next ADA signage project.

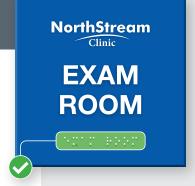

#### **KEEP BRAILLE** TRANSCRIPTIONS TOGETHER

To make things easier for those who are visually impaired, it's required that all braille is grouped together in one section, and always located at the bottom of the sign.

#### DOES YOUR SIGN REQUIRE BRAILLE?

#### Required

Signage identifying permanent rooms and/or spaces, such as restrooms or exam rooms.

Signage offering directions to permanent rooms and/or spaces such as those with arrows pointing to lobbies or exits.

Signage identifying rooms and/or places that frequently change are exempt from ADA requirements, such as signs displaying company names and addresses.

Required on signs for the handicapped

**Optional** on all other signs

# **ACRYLIC**

6" x 8" • 1/4" Thickness Pressed Acrylic

6" x 8" • 1/8" Thickness Pressed Acrylic

# **BRAILLE OPTIONS**

#### **Digital Layered Print Braille**

Our Direct Jet printer uses LED UV ink and light to print full color images, layered surfaces and textured print that are instantly cured. This process creates an innovative, high-quality signage printing solution that is ideal for both interior and exterior use. Digital layered print offers the most design options for braille signage.

#### **Pressed Braille**

With pressed braille, each sign is crafted as one-piece, ensuring that molded text and braille stay in place. Both the top and/or subsurface can be painted or digitally printed with a graphic of your choice.

10" x 8" • 3/16" Thickness
Pressed Acrylic • 2-Color Painted • Custom Size & Shape

Choose acrylic ADA signage by Matthews for a cost-effective, yet durable signage solution. We craft our high-quality pressed acrylic solution as one-piece to ensure that molded text and braille stay in place. We also offer economical acrylic solutions with both rounded and domed braille options, making it easy to meet ADA requirements.

# **ENHANCE YOUR SIGN WITH OUR DISTINCTIVE FINISHES**

### DesignFusion™

Apply designs such as natural wood or stone to just about any raised or recessed surface with this inhouse finishing option that bonds patterns and colors directly to the materials creating a high-end finish at a fraction of the price.

#### **Digital Print Graphics**

Full color graphics, including photographs, can be digitally printed on the top surface to create highly personalized signage.

### **Subsurface Digital Print**

In addition to the top surface, the subsurface can also be digitally printed with full color images to create a more versatile product that outlasts other alternatives.

### METAL

6" x 8" • 1/8" Thickness Aluminum • Painted • Digital Layered Print Braille

6" x 8" • 1/8" Thickness Commercial Bronze • Light Oxidized Finish • Etched Braille

8" x 4" • 1/8" Thickness
Full Painted Zinc • Etched Braille

Choose Matthews' ADA metal signage when you want to convey a sense of permanence and prestige. Our metal signs offer fine detail, crisp text and deep etchings, ensuring your message is easy to read and compliant with ADA guidelines. With seven different material options that can be customized to meet your exact design specifications, we have an option for every budget.

# **BRAILLE OPTIONS**

#### Digital Layered Print Braille

Our Direct Jet printer uses LED UV ink and light to print full color images, layered surfaces and textured print that are instantly cured. This process creates an innovative, high-quality signage printing solution that is ideal for both interior and exterior use. Digital layered print offers the most design options for braille signage.

#### **Etched Braille**

Braille and text are deep etched onto your choice of metal resulting in a clean, detailed look. To comply with ADA requirement, deep-etching must be .032".

#### **Raster Braille**

Small holes are drilled and filled with brass or stainless-steel beads that result in dome-shaped braille dots. Pair with tactile letters for a premium look. *Additional fees apply.*

### CHOOSE THE BEST METAL FOR YOUR PROJECT

Our highest quality metal, commercial bronze offers a traditional look that withstands the test of time.

The strongest silver toned metal, stainless steel provides a clean and modern look for contemporary spaces.

Our most costeffective silver toned metal, aluminum offers a lightweight option that you can upgrade with a decorative finish.

ZINC

Our second most cost-effective silver metal option, zinc is more durable than aluminum and can be painted to match your branding.

The brightest and most unique of our red metals, copper has a truly distinctive and luxurious look while providing excellent functionality.

**BRASS** 

Brass is a timeless and durable metal with an aesthetic that spans from classic to contemporary, depending on the application and finish.

Muntz metal has a warm yellow appearance that is as striking as is it durable.

### **GLASS**

4" x 8" • 1/4" Thickness Low Iron Clear Glass • Etched Braille

6" x 8" • 1/8" Thickness Low Iron Clear Glass • Digital Layered Print Braille • Painted

# **BRAILLE OPTIONS**

#### Digital Layered Print Braille\*

Braille is printed via our Direct Jet printer using LED UV ink and light to print layered surfaces and textured print.

\* Raised surfaces must be painted with a PMS color.

#### Etched Braille\*

Artwork, letters and braille are all reversed etched with a depth of 1/32". We then paint the top and/or back surface of the sign to create a contrast as specified in the ADA guidelines.

4" x 8" • 1/4" Thickness Low Iron Clear Glass • Etched Braille Painted Front with Etched & Painted Back Choose Matthews' ADA glass signage for a contemporary and natural look with sleek design lines and unobtrusive appearance. This signage is created from a single piece of glass and can be etched or digitally printed on both the top and subsurface. Our domed braille system generates braille dots that meet ADA guidelines and will not fall out. To avoid the appearance of fingerprints, a protective matte clear coating can be applied at an extra charge.
