

High Density Urethane

High Density Urethane (HDU) is Matthews' cost effective and durable signage solution.

This material allows for a carved, dimensional look on top of smooth backgrounds. HDU has the largest selection of thicknesses and even has a double-sided option*. HDU signage is 100% waterproof making it ideal for both interior and exterior use.

We can produce HDU signage in any shape or color and in various sizes, creating the ultimate piece to reflect your brand.
