

## WHAT WE DO

Founded in 1850, Matthews International is proud to be one of Pittsburgh's oldest continually operating manufacturers. Recognized throughout the world as the leader in high-quality custom metal products, Matthews is your single source for cast plaques, etchings, metal letters and specialty products.

When you choose Matthews International Architectural Products, you're letting people know that you're committed to quality. The Matthews International quality can be found especially in our cast bronze plaques which are made with a superior alloy that is truly cast in sand, not mass produced in sheets and routed. This extreme attention to quality results in thicker, harder plaques that deliver greater durability.
