

# UV DIGITAL PRINTING

UV Digital Print from Matthews Architectural Products is an innovative, durable high-quality signage printing solution. Our Direct Jet printer uses LED UV ink and light to print full color images and layered surfaces that are instantly cured. The finished signage is ideal for both interior and exterior use and can be printed on a variety of materials, including acrylic, glass and metal.

## UV Digital Print:

- Durable for interior and exterior use
- Cost effective signage solution
- ADA compliant
- Multiple surface options
- High-quality digital print

## ADA Compliant UV Digital Layered Print Signage

Matthews ADA compliant signage features layered surfaces with raised and textured print. The subsurface can be digitally printed with full color images to create a more durable and versatile product that outlasts other alternatives.
